

At Dragon Army, our team is the most important part of our company. And our values are what help us make sure we bring in the right new team members. They are: Team First, Think Positively, and Have Fun. So right off the bat, we need to know if you think these are good values for YOU. If this sounds like your kind of thing, keep reading.

We're a mobile experience company. We strive to build remarkable mobile products and experiences for Fortune 1000 companies. And we're looking for an incredible Back End Developer to join our growing team.

Responsibilities

As a Back End Developer, you are on top of architectural and engineering trends and stay up-to-date on the latest platform releases and updates. You also have a solid understanding of backend systems and how to work closely with a backend team. This person understands how to design, build, and maintain applications and API solutions all while collaborating with a strong development team.

They will be responsible for managing the interchange of data between the server and the users. Your primary focus will be development of all server-side logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end. You will also be responsible for integrating the front-end elements built by your co-workers into the application. Therefore, a basic understanding of front-end technologies is necessary as well.

Required Skills and Experience

- 2-5 Years Experience as a Back End Developer
- Experience with Ruby on Rails, along with other common libraries such as RSpec and Sidekiq
- Good understanding of the syntax of Ruby and its nuances
- Solid understanding of object-oriented programming
- Basic understanding of front-end technologies (JavaScript, HTML5, and CSS3)
- Familiarity with concepts of MVC, Mocking, ORM, and RESTful
- Understanding of fundamental design principles behind a scalable application
- Able to create database schemas that represent and support business processes
- Familiarity with database platform integrations, such as PostgreSQL and MySQL
- Able to implement automated testing platforms and unit tests
- Proficient understanding of code versioning tools {e.g. Git}
- Familiarity with continuous integration

Sound like something you'd be into? Drop us a line at jobs@dragonarmy.com and we'll get back to you.

Our benefits are pretty great. They include things like unlimited vacation, 401k, and we can't forget to mention our **annual company cruise**.

Dragon Army is an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.
